## Career Shadow

*No Charge*

*Mrs. Deborah Enos*

### OBJECTIVE:

- Students will explore a career that may interest them
- Students will gain valuable insight into whether their job or career is something they want to pursue

Career shadowing allows you to explore those careers that may interest you. By "shadowing" someone in their job, you get a first-hand, insider's look into what that person's job involves. The shadowed person can show you just what are the benefits, and challenges, of their position. By seeing how the person interacts with their co-workers, participating in the activities that they face every day, and seeing what it takes to "be that person", you will **gain valuable insight** into whether their job or career is something you might want to pursue yourself.

Student expectations include completing both an essay when you apply and another at the end of the experience, interviewing your host, and writing notes of thanks to your host and their place of employment.
